

### 3 Improves academic achievements.

**Did you know that Sign language covers auditory, visual, and kinesthetic learning styles, improving children's cognitive development? ↓**

**Auditory learners:** As instructions are usually given vocally, these kids fit in well. To help retain and understand new vocabulary, we recommend speaking new signs.

**Visual learners:** Signs can help learners understand and retain information by connecting words and concepts with visuals/pictures.

**Kinesthetic learners:** This lets children learn through movement while using sign language.

**Signing covers all three learning styles, making learning fun and effective. This can boost academic performance across subjects.**

## ASL improves academic achievements.

**Make a list of your students. Assess and reflex on their style of learning.**

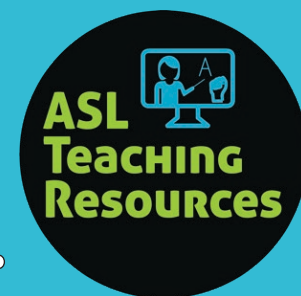

**Note it can be a mixture, but most children lean heavier toward one type.**
