Addition Cards 1-12

Addition Cards 1-3

These sign language flashcards is a great way to learn.
Download and print these to help your children learn the basic math facts.
Use in your classroom for group and individual practice or as a take home practice.

This flashcard set contains 156 cards, plus 15 blank cards.

There are two sets of cards for each set of facts, the first set contains only the facts, the second contains the answers.

Directions: Print on cardstock paper and laminate for longer endurance.
Print the flashcards as two-sided, so that the fact is on one side of the card and the answer is on the other. Alternatively, you can print all the flashcards on separate sheets and stick the sheets together, then cut them to size.

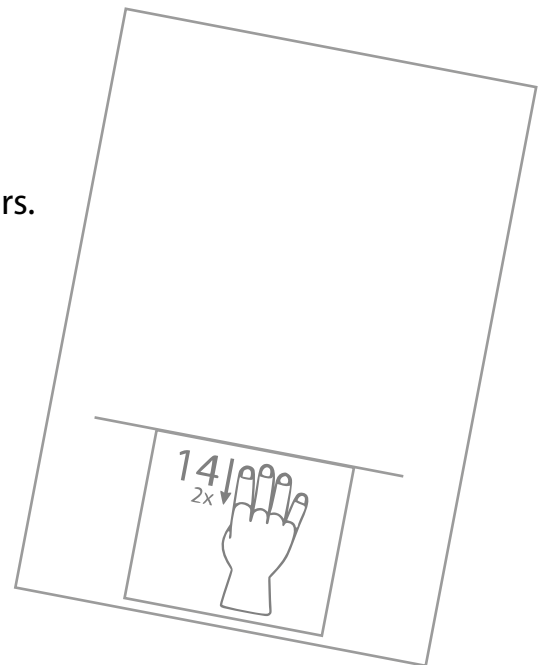

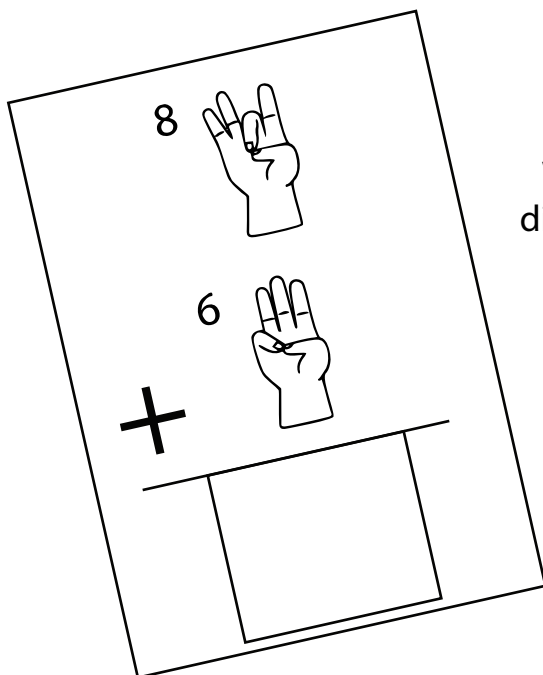

Bonus ideas:

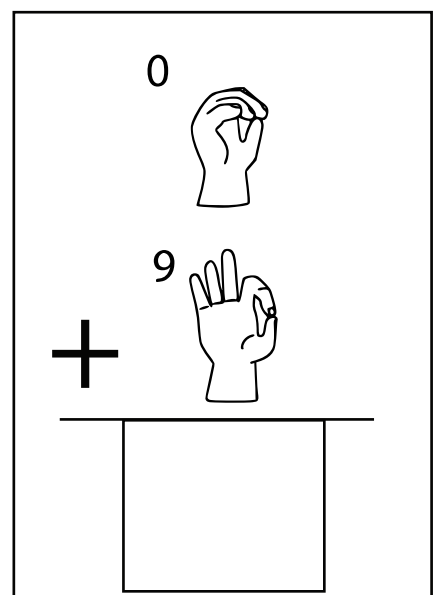

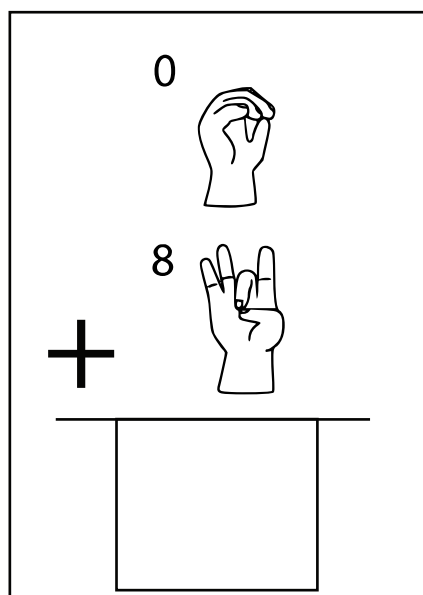

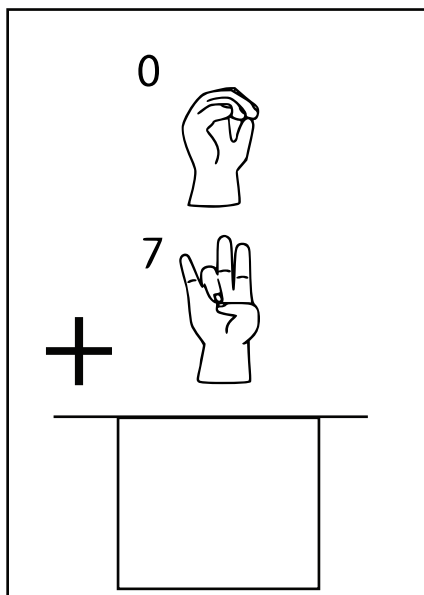

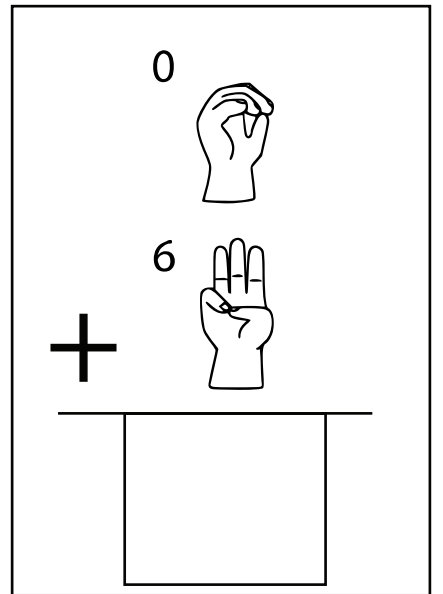

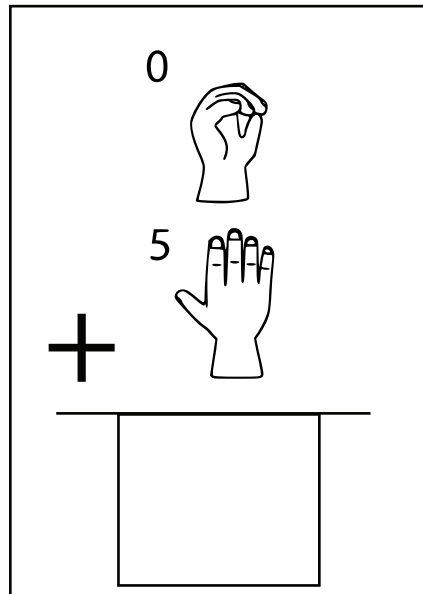

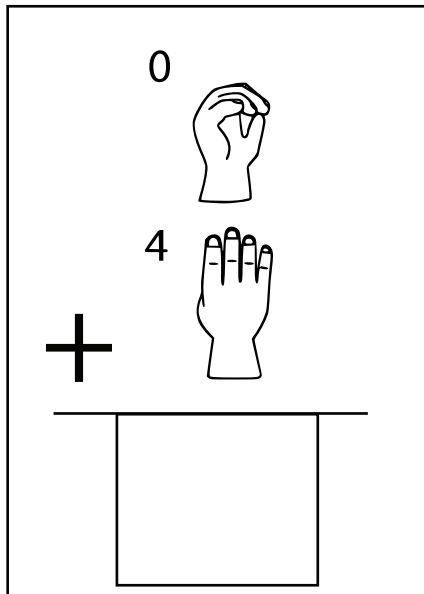

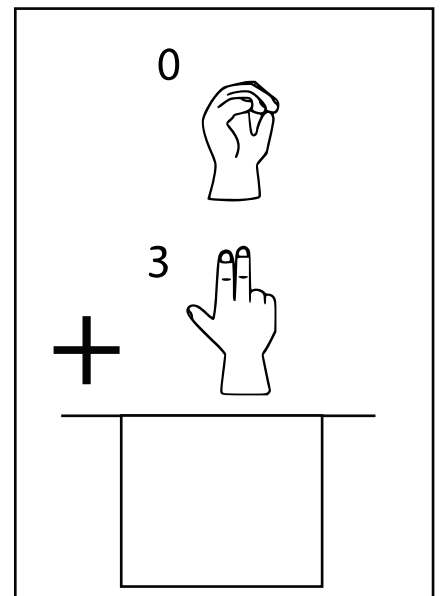

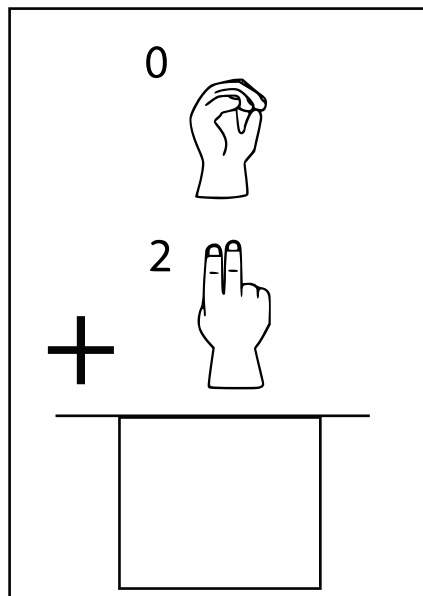

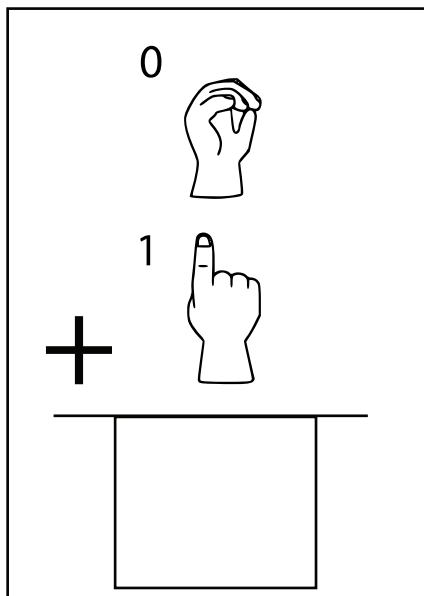

1. Use the answer flashcards and the fact flashcards separate to play games like pairs.
2. Use the answer side only and have the kids write facts to equal the answer.
3. On the answer side, practice writing in word form for the answer shown.
4. Sign the facts then ask the children to answer in sign language.
