How to Use Google Slides™

If you haven't created a free Google account, you will need to do that before implementing the use of this digital resource. In addition, each student will need their own Google account if they will be working in this digital resource.

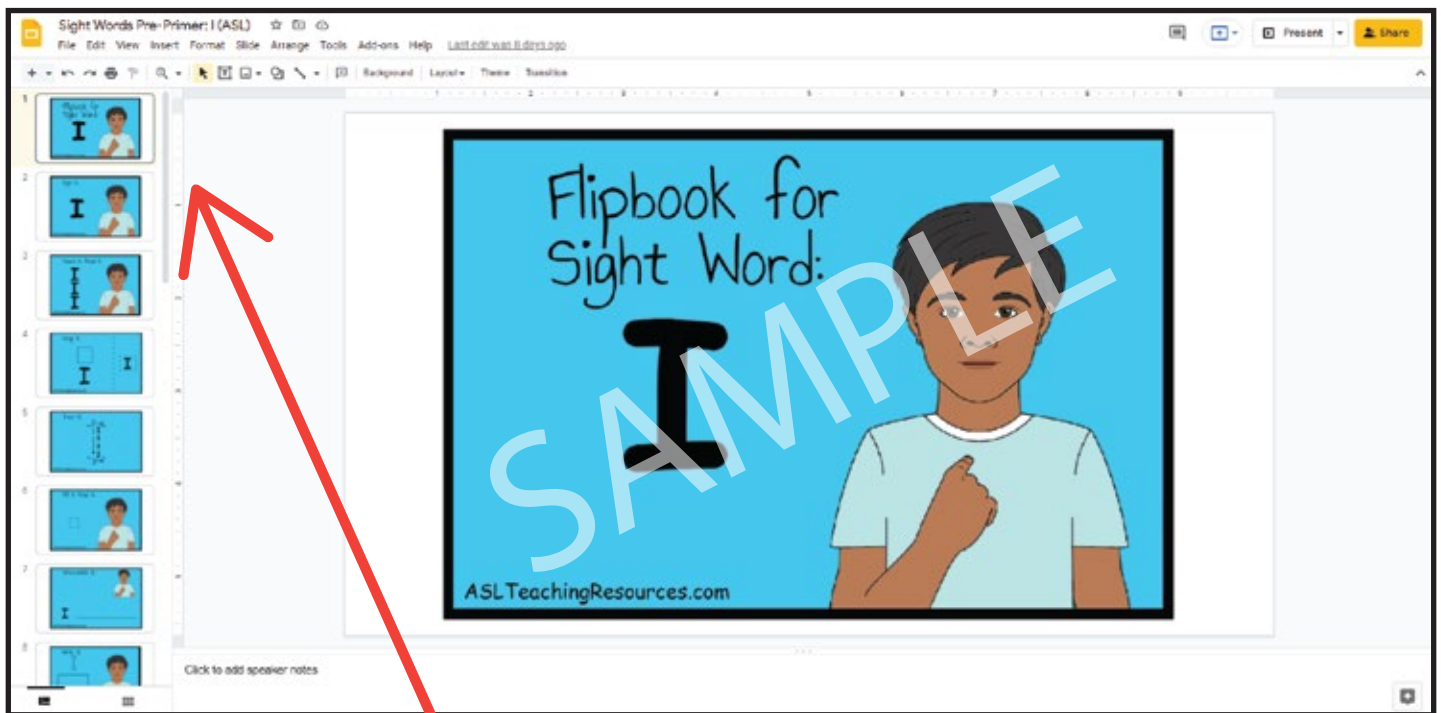

First step: Save a copy of the file on your own Google Drive. You can edit your new copy to accommodate your student's needs. **You do not want to edit the original file.**

Here's what it will look like:

When you click on the link to open the file, you will automatically be directed to copy the file. Click "Make a Copy" and this will save the file to your Google Drive.

After copying the file to your Google Drive, you will be able to open it and access the file.

Don't forget to change the name of the file in the upper left hand corner.

To make a copy for each of your students:

1. Go to FILE>MAKE A COPY>ENTIRE PRESENTATION
2. Save to your preferred location.
3. Assign to students via Google Classroom by selecting the file within Classroom or by sharing the link.

For your students to be able to type, move objects, etc., they will need to be in the slide mode (not in VIEW).

Thank you for not sharing this resource but instead
guiding others to purchase from our site.
