

SIGN LANGUAGE

IN THE CLASSROOM

- ✓ Academic improvements
- ✓ Engages 3 learning styles: kinesthetic, visual, auditorial
- ✓ Can create a more peaceful & harmonious classroom

FREE ASL Lesson Plans!

- We are looking for “pilot classrooms”.
- We work for you.
- You get sign language lesson plans.
- You choose based on your needs.

We will be selecting a few adults who work with children in school or child care to give you FREE sign language lessons in exchange for your feedback and ideas.

Our new, never seen before, ASL lesson plans will be first exposed to our pilot classrooms and then rolled out to our upcoming membership site.

To register your class and to learn more, read on...

SignBabySign.org

INCLUDES:
12 pages, 12 mini flash cards, dice game

Registration 7 days only!!

Pilot Classrooms =
FREE Sign Lesson Plans

What do I get for FREE?

- Two months' free access to ALL our lesson plans.
- Freedom to choose the ASL lesson you want.
- Up to 5 PDF downloadable lessons weekly.
- Child's worksheet of the ASL lesson.
- 8 X 10 PDF poster size ASL sign.
- 1 ASL flash card set each week.
- 1 ASL dice set each week.

Is this quick and easy?

- Absolutely very little time involved! The lesson plan does most of the work for you!
- For each lesson plan we give you, we require feedback to get our next lessons. It's that simple.

How will this benefit me?

- Saves you time searching for sign language resources. We have an extensive library of ASL lesson plans.
- Lightens your work load with our easy plans that include games, crafts, worksheets, videos, & more.
- Feel confident in signing the word correctly by using our “how to sign” in print and video format.
- Since you already use non verbal communication, you can incorporate a second language.
- With teachers and students using sign in the halls, it can truly be a “zero talking” area.
- Signing gives a new meaning to “quiet time”. Children learn to sign what they need.
- Signing can bring peace to a typically loud environment.

How will this benefit the children?

- Builds on the signs the children learned in Child Care.
- Having multiple pathways, like using sign, stimulate the synapsis brain functions.
- Signing reinforces and locks in the learning experience.
- Children engage more in learning when they are physically involved. Signing can involve the mouth, hands, and body.
- Signing requires eye contact which creates a natural focus to the teacher.
